

Adasio™ Performance Alfalfa

Alfalfa Hay - Bales

Performance Dairy

Adasio Performance Alfalfa is an important part of the Adasio Feeding Program that leads to increased milk production and quality. Whether you have a grazing or dry lot operation, our feeding programs are right for you. Adasio Feeding Programs can help you minimize costs and bring your dairy cattle up to maximum production quicker.

Adasio Corp is known for its high quality crops grown under an environmentally protective water conservation program in the U.S.A. This sustainable agricultural practice provides a rich supply of organic nutrients to the fields producing high feed value alfalfa hay. No chemical fertilizers are ever applied or needed.
