*Grown With Recycled Water*

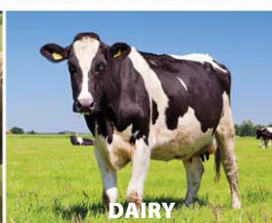

**ADASIO™ PERFORMANCE | Alfalfa**

**ADASIO™ PERFORMANCE | Alfalfa Oats**

Analyzed, measured, rated and approved by the USA National Hay Association and the USDA.

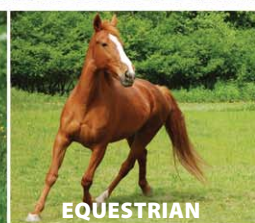

**BEEF**

**DAIRY**

**GOATS**

**EQUESTRIAN**

*Grown with*  
**Recycled Water**

# About Adasio Corporation

Adasio Corp is a specialty importer of feeds, forages, and grains for livestock, dairy, equine, pet, exotic, exhibition, and sport animals. Our mission is to develop high-performance animal feeding programs from agriculturally sustainable water resources on our farms in the U.S.A. Grown in the central United States, Adasio crops are never treated with chemical fertilizers and the recycled water is used to recharge the Ogallala aquifer.

## Team

**Jim Goetz**  
President & Co-Founder

**Geraldine Nidasio**  
General Manager & Co-Founder

**Ellen Dierenfeld, PhD**  
Animal Nutritionist

# About Adasio™ Performance

Superior quality animal feed grown from recycled water.

It takes a superior quality feed to achieve the best from your animals. Adasio Performance feeds deliver exceptional animal nutrition that in many cases completely replaces additional rations and supplements. This translates into enhanced production capacity, improved health and longevity, and increased strength and activity levels.

## Eco-Agriculture and Water Recycling

The only one of its kind in the world!

Adasio products are more than just superior quality products. They are grown and produced with environmental protection and conservation practices that help manage the water table in the western Kansas portion of the Ogallala aquifer. The Ogallala is one of the largest aquifers in the world, and like others, its level has been dropping for many years.

Instead of using aquifer water to irrigate our crops, a practice which has caused problems all over the world, e.g. Mexico and India, we send it to local cities and industry. The water is then returned to us where it is bio-digested and used for irrigation. The natural organic nutrients in the water eliminate the need for chemical fertilizers which provides even further environmental benefits.

*Truly an organic  
and environmentally  
sound agricultural  
practice!*

Grown with  
**Recycled Water**

ALWAYS look for this logo which indicates Adasio's innovative Eco-Agriculture and Agro-Water recycling process.

This sustainable water process has received recognition and rewards from the State of Kansas and the U.S.A. Environmental Protection Agency.

# Beef | Dairy | Equestrian | Goats

Fresh, high-quality feed is the first step towards improved animal performance. However, it is essential to follow a proper feeding protocol to maximize your animal's productive capacity and livelihood. Our team of animal nutrition experts has developed specific feeding programs for dairy and beef cattle, goats, and the equestrian market. Please refer to the feeding protocols found on Adasio feed packaging or online at [www.adasiocorp.com](http://www.adasiocorp.com).

## ADASIO™ PERFORMANCE | Alfalfa

### Ingredients

100% Alfalfa (Medicago s.)

Quality: *Supreme*

### Guaranteed Analysis

Protein..... 27% MIN (DRY)

Acid Detergent Fiber ..... 28% MIN (DRY)

## ADASIO™ PERFORMANCE | Alfalfa Oats

### Ingredients

100% Alfalfa Oat Mix (Medicago s., Avena s.) Field Grown

Quality: *Supreme*

### Guaranteed Analysis

Protein..... 23% MIN (DRY)

Acid Detergent Fiber ..... 30% MIN (DRY)

Follow these instructions for improved production, lower costs, and agricultural sustainability.

- Always feed fresh, ADASIO high-quality forage for improved performance
- Follow the specific feeding protocols for each forage

Our team of agricultural experts, nutritional scientists and sustainability experts has developed feeding programs on six continents. Please refer to additional informational that can be found on the Adasio feed packaging labels and online at [www.adasiocorp.com](http://www.adasiocorp.com).

Always look for the ADASIO CORPORATION, SA logo as a symbol of authenticity.
